

# Skyhook® Advanced Features

## The ultimate vessel control experience

Mercury's latest innovative offering, Skyhook Advanced Features, provides even more control over your Joystick equipped vessel for very specific situations. Available as downloadable content (DLC) through the GoFree Shop, you can purchase the exact features you want or bundle them all together for the ultimate vessel control experience.

These features require Mercury's latest joystick system and the VesselView903. VesselView502, VesselView702, VesselView703 and compatible Lowrance and Simrad displays will have these features available for purchase after a software update in early 2018. The electronic control modules on your Joystick system may need to be have firmware updated by your Mercury certified dealer in order to utilize these advanced features.

### Heading Adjust

a SKYHOOK feature

Capability to adjust the heading lock in 1 and 10 degree increments while in Skyhook or Drifthook. Boating made easy just got easier.

### Bowhook

a SKYHOOK feature

Unlock heading and just maintain position, allowing the boat to point in whatever direction the winds and currents dictate. Useful when a locked in heading is not necessary.

### Drifthook

a SKYHOOK feature

Maintain heading and unlock the position of the vessel allowing winds and currents to move the vessel along. Adjustments of 1 and 10 degree increments can be made while drifting when bundled with Heading Adjust.
