

MERCURY SPITFIRE

THE ULTIMATE
PERFORMING
ALUMINUM 4-BLADE
PROPELLER FOR
LARGER ENGINES

For Sterndrives & 135HP+ Outboards

By popular demand, Mercury has expanded the SpitFire line making it available for higher horsepower applications. The popular SpitFire provides ultimate performance unlike any other aluminum propeller, with improved acceleration and no penalty on top speed. Engineered for larger gearcases, the four blade design transforms your family runabout into a tow sports machine.

- Designed for high horsepower applications, available from 17-23 pitch for any 3.0L, 4.2L and 135 hp and up applications
- Having a low diameter allows for quicker holeshots
- Superior holding that keeps your boat on plane through tight turns

Visit your local Mercury Dealer or Mercury prop selector at mercurymarine.com to find a SpitFire that is right for you!

MERCURY BLACK MAX

For good overall performance and value, the Black Max is the propeller that will get the job done. They are standard equipment on most boats with Mercury/Mariner/MerCruiser power. Made of aluminum, it is a more cost-effective alternative to stainless steel, while still providing the outstanding performance that Mercury branded propellers are known for. They can also be much easier to maintain and repair compared to their stainless-steel counterparts.

The Black Max is recommended for use on boats with up to 250 horsepower and a top speed of less than 50 miles per hour. The Black Max family consists of propellers for a wide range of boating types, with a few propeller SKUs made specifically for use on pontoons (Black Max XC). The additional cup on these propellers helps to lift pontoons and improve acceleration for heavy boats. Black Max propellers come standard with an attractive and durable high-gloss Phantom Black finish.
